WATER | SESSION DIGITAL | ENERGY

27 SEP 20
5 OCT 21

For over 30 years H2O has been the focus event for water utilities in Italy, keeping discussion alive on major issues such as sector-specific industrialization, technological development and the process of digital and ecological transition.

The Exhibition, also hosting the CH4 gas section, will field a comprehensive program of events aimed at broadening the debate to include the full energy scenario and involve technology developers, utilities and institutions.

This new Exhibition Network, developed by BolognaFiere in partnership with Mirumir and In Fieri, will start with an online event during the run-up to the on-site show scheduled from 6 to 8 October 2021 in Bologna. The Exhibition will focus on the following main topics:

International Water Exhibition Technologies, Treatment Distribution, Sustainability

Technologies and Systems for the Transport and Distribution of Gas

Working with Drones

International Conference & Expo Direct Uses of Liquid Natural Gas

The Service Station of the Future Traditional and Alternative Fuels and Electric Mobility

Hydrogen Energy Summit & Expo Hydrogen Production, Logistics and End-Uses

WATER | SESSION DIGITAL | ENERGY

2021 WATER+ENERGY DIGITAL SESSION:
27 SEPTEMBER/5 OCTOBER

The Water+Energy Digital Session will be a preview of the on-site Exhibition. The B2Match platform will facilitate meeting opportunities between companies and professionals in the water, methane, hydrogen and alternative fuels sectors.

This online Session is a business-specific tool for operators at a time when the pandemic is still impacting our behaviour and travelling habits.

The matchmaking platform makes available business profiles of companies belonging to the Exhibition Network together with professionals such as technical and executive managers, engineers and executives of companies in the following sectors: water and gas supply, sewerage, fuel transport, service stations, utilities, fleet and heavy industry.

Thanks to the cooperation with **ITA - The Italian Trade Agency**, Water+Energy Digital Session will also be attended by selected international operators from key markets (Germany, Spain, France, Switzerland, Austria, United Kingdom, Belgium, The Netherlands, Slovenia, Croatia, Israel, Turkey, Moldova and Kosovo).

Participants will be able to identify potential business partners thanks to easy-to-use search filters allowing personalized flexible schedule planning.

HOW IT WORKS

The online B2B meeting agenda between Network exhibitors and professionals will be hosted on the B2Match platform, which has already been successfully tested by BolognaFiere.

Detailed profiles and advanced search filters (i.e. by country or type of product) will allow participants to fix well-matched 1:1 business meetings. Participation is organized in three steps:

1. REGISTRATION

participants can already create their account.
It's simple and quick

2. BOOKING

starting September, 6 participants will be able to browse the list of potential partners and request and confirm meetings, creating a personalized agenda and place confirmed appointments in their personal calendar.

3. THE WATER+ENERGY DIGITAL SESSION

to be held for 9 days on the video-integrated B2Match platform. Participants can then agree to take their contact further during the on-site event (Bologna, 6 - 8 October 2021).
